Analytics oriented professional with an **entrepreneurial background**, currently pursuing a **Master of Management in Analytics at McGill University**. Applying **quantitative analysis, agentic AI**, and **data driven insights** to support **strategic decisions, automate and improve processes**, and enable **business transformation**. Strong communicator with experience translating complex analyses into actionable recommendations for business stakeholders.

Education

McGill University – Master of Management in Analytics (MMA)
Entrance Reward Scholarship

Montreal, Canada
July 2025 – December 2026

University of Macedonia – BSc in Applied Computer Science
Concentration in Business & Finance

Thessaloniki, Greece
September 2017 – January 2022

Certifications & Courses

- AWS Solutions Architect – Associate
- Structuring Machine Learning Projects (DeepLearning.AI)
- AI Agents in LangGraph (DeepLearning.AI)

Professional Experience

DataSphere Lab - CAE – Data Architect

- Consulting and architecting a new data management system, transitioning from a legacy infrastructure to a high-performance lean database.
- Working with cross-functional teams to optimize system latency by 40% while securing enterprise-grade data integrity in migration.

Montreal, Canada
January 2026 – Present

Canadian National Railway – Team Lead – Solutions/Data Architect (MMA Capstone)

- Leading a cross-functional team to scope, design, and deliver data-driven ai detection systems for railway infrastructure using Google Cloud.
- Targeting reduced inspection by 25% as well as reduced maintenance costs, improved safety, and faster decision-making.
- Translating complex data sources (image, video, LiDAR) into actionable insights through computer vision and machine learning.

Montreal, Canada
September 2025 – Present

Thinkr – Consultant

- Advising go-to-market strategy for Nora AI a sales outreach automation startup applying for YCombinator.
- Conducting market analysis and competition analysis to support strategic positioning and investment readiness.

Montreal, Canada
September 2025 – Present

Le Grand Cormoran – Owner

- Directed daily operations with a team of 10–12 staff, achieving consistent revenue growth.
- Applied analytics to optimize product mix and marketing campaigns, improving ROI by ~30%.
- Streamlined inventory and financial planning, reducing waste and improving margins.

Montreal, Canada
February 2023 – December 2024

Leadership & Honors/Awards

Aldo x AWS Retail Hackathon – Team Lead/Solutions Architect (1st Place)

- Spearheaded a team of 5 to develop a voice agent “*Whisper*” augmenting Aldo’s sales associate and ensuring alignment between employees and the head offices.
- Delivered and presented an AI enabled business solution to senior industry stakeholders from Aldo and AWS and won 1st place and \$6000 prize.

Centraide x Intact x McGill Scope-Ai-Thon – AI Consultant (Top 3)

- Alongside my team, we scoped an AI powered solution to solve Centraide’s issue of managing multi-modal fragmented data sources from across 350+ partnered agencies.
- The approach made was part of the top 3 solutions, which we will present to Centraide’s executives, to help their cause of serving vulnerable groups.

Databricks Hackathon – Team Lead/Agentic AI Developer (3rd Place)

- Lead my team into creating an AI Pharmacy Agent on the Databricks platform.
- We achieved 3rd place; surpassing teams formed of Databricks professionals.

Data & AI Projects

Automated Inventory Reporting – Cizzle Brands

- Created an ETL pipeline for automating ingesting data from irregular excel files to standardize and consolidate fragmented inventory data for reporting and analysis.
- Developed a PowerBI dashboard and a GenAI layer for report generation on the cleaned data layer, that reduced time consumed by 70%.
- **Tools:** Python, Azure Event Grid, Azure Functions, Azure Logic Apps, Azure Blob Storage, PowerBI, Azure OpenAI

Agentic Portfolio Website

- Built an agentic RAG chatbot interface with planning, vector search, and reranking to answer recruiter questions, using LangGraph for multi-step orchestration.
- Implemented production guardrails including rate limiting, prompt-injection detection, caching strategies, and async analytics logging to optimize costs and performance.
- **Tools:** Python, FastAPI, LangGraph, LangChain, OpenAI API, Supabase, PostgreSQL, pgvector, GitHub API, Resend, LangSmith

AI Academic Assistant (Discord) – MMA Cohort 8

- Automated access to events/documents, reducing search time and enhancing team collaboration by more than 30%.
- Developed RAG-based assistant integrating calendar + AWS S3 notes for McGill MMA cohort.
- **Tools:** Python, SQL (Supabase/PostgreSQL), Pinecone, OpenAI API (GPTs), AWS (S3, Lambda, ECR), Docker, LangChain

Retail Sales Forecasting – Le grand cormoran

- Delivered Streamlit demand forecasting dashboard for inventory & staffing optimization, reducing waste and improving efficiency.
- Designed ML pipeline to forecast café sales (10-day horizon) using POS + external data (weather, macroeconomic indicators).
- **Tools:** Python (pandas, scikit-learn, XGBoost, Ridge), APIs (Meteostat, FRED), Streamlit, Plotly

Skills

Business & Consulting: Problem Solving, ROI Analysis, Process Improvement, Business Transformation, Critical thinker, Change management, Cross-functional collaboration, Team communication, Agile, Entrepreneurial, Structured presentation, Stakeholder Management, Insight Extraction, Task Ownership, Priority Matrix, Data Storytelling, Organization
Data Strategy & Analytics: Decision analytics, Hypothesis testing, Digital transformation, Text Analytics, ETL Pipelines, Anomaly Detection, Feature engineering, EDA, Clustering, Data Scoping, Unstructured Data, Data Cleaning, Classification, Model Evaluation, Process Automation,
AI & Machine Learning: Demand forecasting, Generative AI, RAG, Vector Databases, Agentic AI (ReAct, Multi-Agent Orchestration), LLMs, Predictive/Descriptive Modeling, Applied Intelligence, NLP, MLOps, Time-Series Analysis, Decision Trees, Prompt Engineering
Languages & Core: Python (Pandas, Scikit-learn, PyTorch, Gurobi, FastAPI, SHAP, XGBoost), SQL (Postgres, MySQL), Java, JavaScript, Excel, Power Query, GitHub, Jupyter
Data Visualization: Power BI, Streamlit, Matplotlib, Seaborn, Plotly
Cloud & DevOps: AWS (Cloud Architecture, Bedrock, S3, EC2, API Gateway), Azure (Logic Apps, Event Grid, Blob Storage), GCP, Docker, GitHub Actions, CI/CD Pipelines, Render
AI Stack: OpenAI API, LangChain, LangGraph, LangSmith, Pinecone, HuggingFace, GitHub Copilot, Codex, Databricks, AWS Bedrock, AWS SageMaker, RAGAS

Languages

English (Fluent – Proficient – Native level), **French** (Intermediate), **Greek** (Fluent – Native), **German** (Basic)
